Contains Petroleum Distillate

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling and the main Federal Labeling must be in the possession of the user at the time of pesticide application.
- Read this SLN label and the label affixed to the container before applying.
- Use of this product according to this SLN label is subject to all use precautions and limitations imposed by the label affixed to the product container.

CROP	INSECT	RATE Oz/Acre	COMMENTS
Peppermint, Spearmint	Two-spotted Spider Mite (egg and immature forms)	12-20	Apply by ground in 20-25 gallons of water per acre. Apply by air in 5-10 gallons of water per acre. Note: Insufficient coverage and/or certain environmental conditions may reduce the efficacy of Onager Optek when applied by air. Use the lower rates when mite infestation levels are low and higher rates on moderate to high mite infestation. For best results apply Onager Optek prior to adult mite build up when an economic numbers of mites are present.

RESTRICTIONS

- Do not make more than one application per acre per year.
- Do not harvest within 30 days of application
- For agricultural/commercial use only. Do not use in or around the home.
- Onager Optek is non-hazardous to bees and may be applied during bloom. However, if tank mixed with another product that may be hazardous to bees,
  the tank mix spray should not be applied when bees are actively visiting the treatment area. Follow label restrictions of any tank mix product.
- Chemigation: **Do not** apply this product through any type of irrigation system.
